

WorldCat Local Install Notice

Install date: Sunday, February 13, 2011-02-09

Local Holdings Record Display and Links

In November, we expanded the display Local Holdings Record (LHR) data on WorldCat Local detailed records from serials to all item types. LHR display can be enabled on the **'OPAC Statures, Locations and Circulation Policies'** module in Service Config (seen below in Figure A).

With the February install, we are adding the ability to configure LHR elinks to display on the Search (Brief) Results page (seen below in Figure B). LHR eLink (856) configuration is available on the **'Full Text and Open Access Links'** module in Service Config (seen below in Figure C). Moving these links forward to the Search Results page supports our goal to place one-click access to information as early as possible in the discovery process. We will be adding the coding for the functionality with the February 13 install, but you will not be able to see the links until Monday, February 14.

Monograph Configuration

Please list all status messages and fulfillment options that appear in your OPAC.
 NOTE: If the location of an item impacts the policies you set for the item, please include all possible combinations of statuses and locations. If the location of an item does not impact the policies you set, please leave the location cell blank.

First display LHR with option to search local OPAC for availability

Allow users to initially view the online links and other data contained in the item's LHR, with an option to search the local OPAC for availability. If no LHR is found, availability is displayed automatically.
 For information about loading Local Holdings Records, please see:
<http://www.oclc.org/batchprocessing/options/holdings/localdatarecords>
 NOTE: The Any Status/Any Location fulfillment options for Monograph will be used when this box is checked.

LHR Data display

We have worked to improve the display in WorldCat Local of detailed holdings in the LHR records. In general, summary field should display once for each library symbol. We have improved the display of location, call number and public notes based on data in the detailed holdings fields (86x and 87x fields) of the Local Holdings Records. This data is very much unique to each institution and that will make a difference in what is displayed.

508, 511, 518 fields

We are now displaying MARC fields 508, 511 and 518 from master bib record on the detailed record

The screenshot shows the WorldCat Local record for "Live 1966" by Bob Dylan. The record includes the following details:

- Title:** Live 1966

Interoperation with OLIB for Availability and Place Hold

WorldCat Local now interoperates with OCLC's OLIB integrated library system to display real-time availability information and to place holds. This extends the range of ILS with which WorldCat Local can interoperate, making it possible for OLIB libraries to offer WorldCat Local as their discovery solution.
